

21.0 LogiX Excel Profile

The LogiX Excel Profile button produces various Excel reports and charts simultaneously, which are saved automatically in the work area folder on exit. The folder is recognised as 'LX Profile'.

Please note that the LXProfile is overwritten each time the user exits the reports but can be saved any other networked location, using 'File', 'Save As' from the standard toolbar.

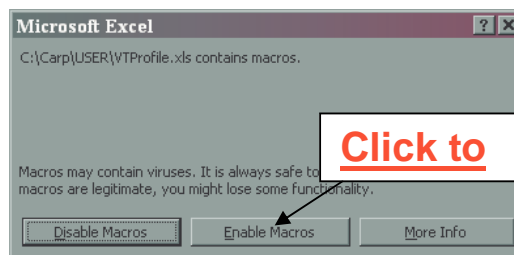

Report examples: -

- Statistical route evaluation summaries for KPI's, driver and vehicle utilisation, and cost (portrait and landscape formats)
- Route breakdown calculations and route costing reports
- Graphical vehicle time profile information for week and individual days
- Depot summaries with schedule information
- Driver schedules
- Delivery and collection reports

To Create the Reports:

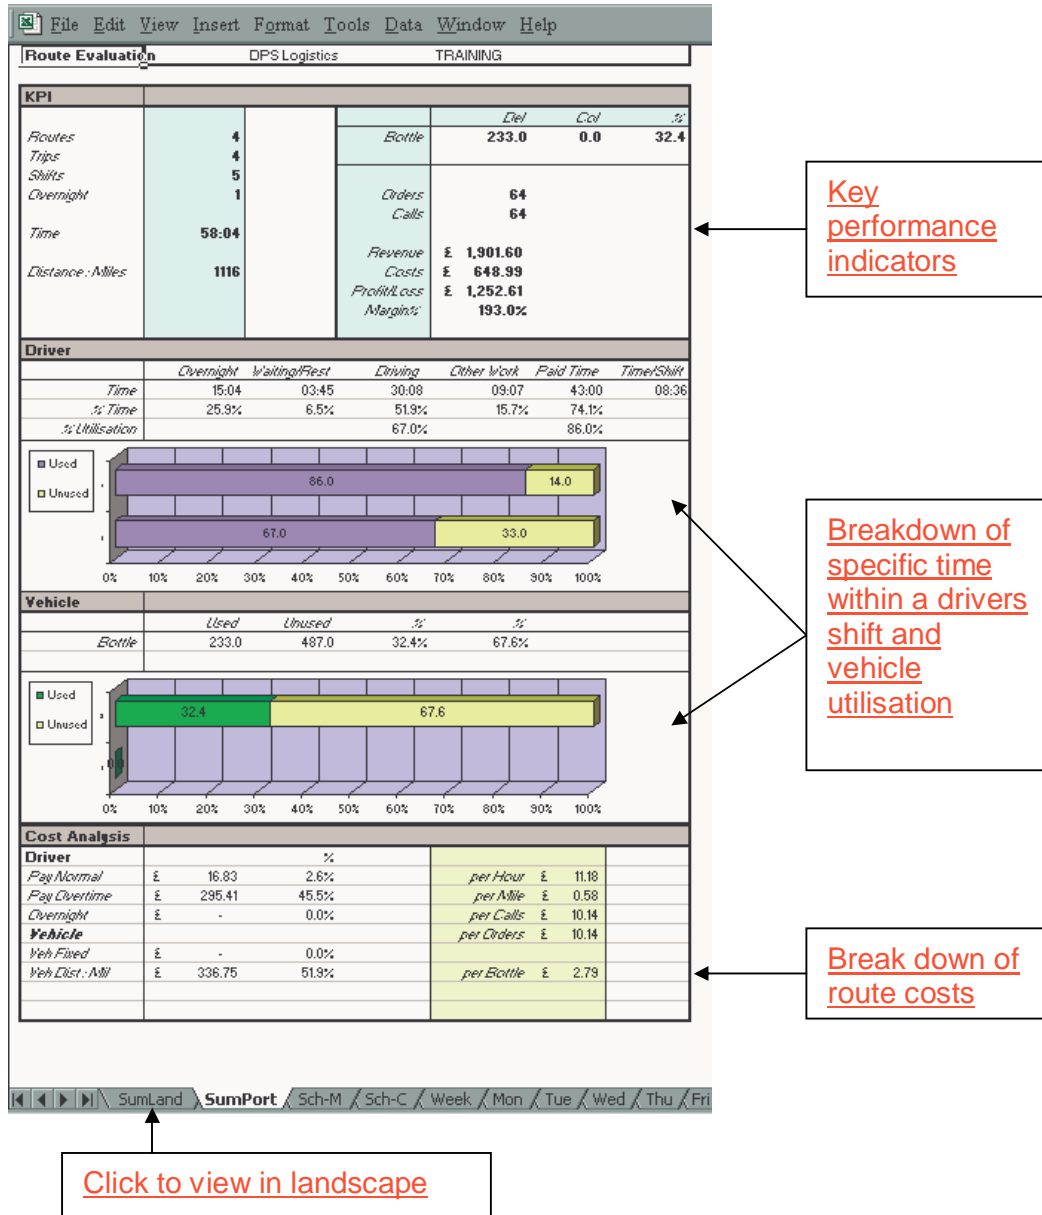

1. Select the routes you wish to create the reports for from the route list and then click the the Logix Excel Profile button.
2. When the message box appears, as highlighted below. You will need to click the 'enable macros' for the system to create the reports.

Note: A macro is a set of keystrokes and instructions that are recorded, saved, and assigned to a short key code. When the key code is typed, the recorded keystrokes and instructions, execute (play back). Macros can simplify day-to-day operations, which otherwise become tedious.

21.1 Route Evaluation - Summary

Chart and graphical data summaries are displayed in landscape and portrait formats. Click onto the relevant tab at the bottom of the sheet for your selection.

21.2 Schedule Master

The Master file displays the combined schedule information.

Route Evaluation		DPS Logistics		TRAINING

21.4 Vehicle Time Profile for Week

This reports the number of vehicles that are out during particular times of day, for the whole week.

21.5 Displaying Individual Days

You are able to filter the day of the week you wish to individually view, by clicking the day of the week from the spreadsheet tabs at the bottom of the page. An example is shown below.

21.5 Collections and Deliveries

The next two tabs for 'collection' and 'delivery' gives detailed information on the order, for example delivery time, route number, special instructions and quantity ordered

21.6 Depot Summaries

You will find individual summary breakdowns for the depots including costs, basic route information.

21.7 Route Itineraries

Displays the manifest or drop sheet.

Note: All the reports can be saved onto a shared drive, benefiting central planners and customer service departments due to the ease of access to this type of information without the need to call or to email files.
